

PRESS RELEASE

Lexham Power, a company belonging to the EOS Investment Management Group, acquires a majority stake (51%) in Innovo Agri

A new integrated industrial platform is created in Italy for the management of the entire life cycle of agrivoltaic projects

London | Luxembourg | Milan, 17 February 2026 - EOS Investment Management Group (EOS IM), an independent asset manager and one of Europe's leading players in sustainable investment and energy transition, announces that **Lexham Power**, an independent power producer (IPP) wholly owned by the Group, has acquired **51% of Innovo Agri**, a business founded by Innovo Group specialising in the development and integrated management of agrivoltaic projects, which introduces an advanced consulting model to support agricultural entrepreneurs, developers and financiers throughout the entire life cycle of agrivoltaic projects.

Following the transaction, the company will be renamed **NT Innovo Agri**. The shareholding structure is completed by Innovo Capital Partners (39%), an operating holding company led by Rodolfo Bigolin active in the energy and sustainable transition of critical infrastructure in Italy, and the Tuscan company Nextitude (10%), specialising in engineering and consulting in the energy sector.

The transaction creates an integrated industrial platform capable of overseeing the entire life cycle of agrivoltaic projects: from preliminary agronomic consulting to executive design, from the procurement of goods and services to operational management in the field, to AgriPV Compliance Monitoring services, ensuring full compliance with regional and national regulatory standards over time.

NT Innovo Agri will position itself as a single point of contact for the agricultural and energy components of projects, ensuring productivity, traceability of activities and full bankability of initiatives.

*"With this operation, we are strengthening our strategy of building integrated industrial platforms along the entire energy transition value chain," commented **Giuseppe La Loggia, Senior Partner at EOS Investment Management Group**. "Agrivoltaics is a key segment for the country's economy, but it requires multidisciplinary skills, full regulatory compliance and executive capacity. With Lexham Power and NT Innovo Agri, we are creating an industrial model capable of combining agricultural productivity, energy efficiency and project bankability, offering the market a structured and scalable solution. Our goal is to become a national benchmark in the development and management of new-generation agrivoltaic plants."*

*"The acquisition of a majority stake in Innovo Agri strengthens Lexham Power's industrial positioning and execution capabilities in line with a plan to complete the construction of over 0.5 GW of new solar capacity, mainly agrivoltaic, already authorised over the next 24-36 months," said **Filippo Stefanelli, CEO of Lexham Power**, "as well as consolidating our position as a leading operator in the agrivoltaic solar sector."*

*"With Innovo Agri, we want to build a bridge between the agricultural world and the energy industry by offering cross-cutting expertise, process traceability and a strategic approach to promote the development of agrivoltaic projects that are sustainable from both an environmental and economic point of view," said **Rodolfo Bigolin, Chief Executive Officer of NT Innovo Agri**. "By combining agricultural productivity, regulatory compliance and sustainability, we are filling a gap in the renewable energy landscape, supporting all players in the supply chain, including project financiers, in the sustainable transition of our country."*

Rodolfo Bigolin will be joined by **Marco Scarpelli** as **Managing Director**, who has extensive experience in plant development and consulting for real assets in the energy sector.

The operational heart of the company will be in Tuscany, in the province of Pistoia, a meeting point between agricultural roots and the development of new technologies related to the energy transition.

About EOS Investment Management Group

EOS Investment Management Group (EOS IM) is an independent international group headquartered in London, with offices in Milan and Luxembourg, specialised in promoting alternative investment funds dedicated exclusively to the energy and sustainability transition. It operates at the European level in the private equity and energy infrastructure sectors, having been a pioneer in new-generation renewable energy investments without relying on public subsidies. EOS IM Ltd is authorised and regulated by the UK's Financial Conduct Authority and has adhered to the UN Principles for Responsible Investment (UN PRI) since 2019.

About Lexham Power

Lexham Power is an independent power producer (IPP) focused on the development, construction and operation of renewable energy plants, with a particular focus on agrivoltaics. The company is wholly owned by EOS Investment Management Group, an independent asset manager specialising in alternative investments in the infrastructure and private equity sectors, with a focus on energy transition and sustainability.

About Innovo Group

Innovo Group is the company founded by Rodolfo Bigolin in 2022 with the aim of strengthening critical infrastructure to support the country's energy transition, electric mobility, digitalisation and agronomic development. Through its operating holding company Innovo Capital Partners, the Group leads the activities of Innovo Infrastructure – an industrial platform dedicated to the development and construction of infrastructure in the renewable energy (Innovo Renewables), electric mobility (T-Carica) and digital infrastructure (Innovo Datacenter) – of Innovo Agri, a company that supports agricultural entrepreneurs, developers and financiers throughout the entire life cycle of agrivoltaic projects, as well as other initiatives in segments characterised by favourable structural trends and growing demand for sustainable and digital investments.
